About This Report

The **2019 TLMI Compensation and Benefits Survey** was commissioned with the objective of providing TLMI members with comprehensive, accurate, and timely data on industry compensation and employment practices.

This study was conducted for TLMI by Industry Insights, Inc., an independent, professional research and consulting firm headquartered in Dublin, Ohio. The company specializes in conducting industry operating surveys, compensation and benefit studies, and member attitude surveys for trade and professional associations, as well as offering educational programs and customized research services.

In addition to the information contained in the **2019 TLMI Compensation and Benefits Survey**, all firms participating in this study received a confidential individual Company Compensation Report. The information in this confidential report contains an individual company's compensation levels compared to all responding firms, as well as the appropriate industry comparative (i.e., appropriate region and sales volume aggregates) right alongside the firm's own figures for easy comparison.

TLMI and Industry Insights wish to express gratitude to those members who participated in the survey. Your support was essential in making this study a success.

Survey Methodology

The TLMI Compensation and Benefit Survey was conducted during the late spring of 2019. Survey questionnaires were mailed to TLMI members in March and responses were received through early June. A total of 106 questionnaires were received by Industry Insights, Inc. A detailed breakdown of survey respondents is included in the Respondent Profile.

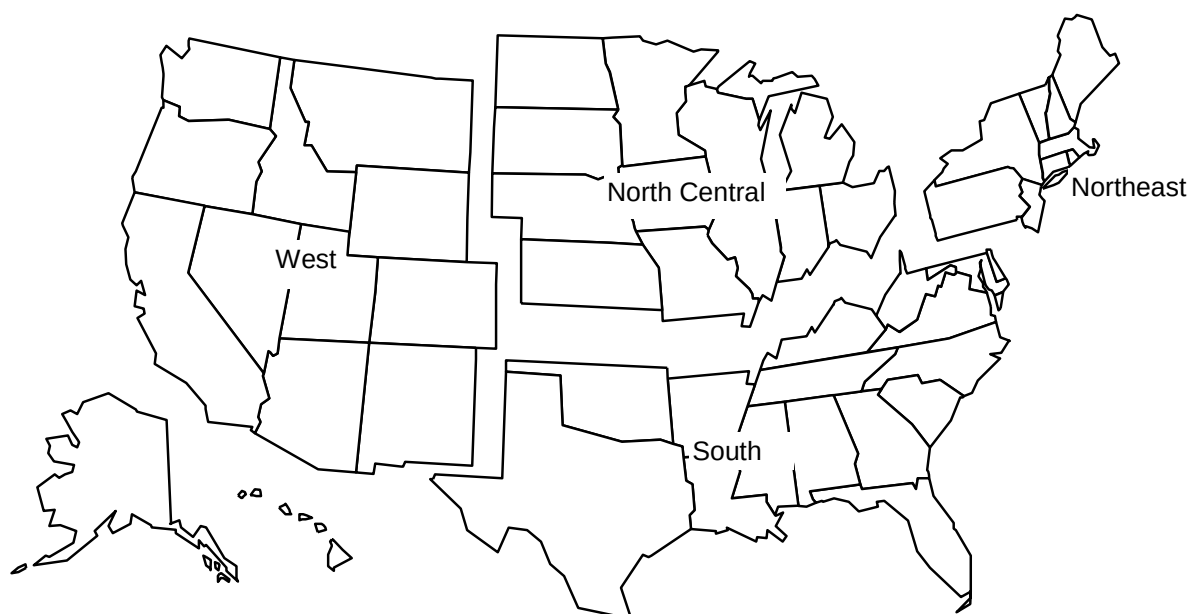

Upon receipt, all questionnaires were assigned a confidential identification number and any reference to company name was removed from the survey form. All survey data was analyzed for accuracy and keyed for computer processing. Strictest confidence of survey responses was maintained throughout the process.

Final results were tabulated by Industry Insights, Inc. and the final report was completed in August 2019. All TLMI members that participated in this study received a free copy of the final report along with an individualized Company Compensation Report.

Using This Report

The information contained in the pages of this report is designed to be of great benefit to anyone concerned with the employee compensation and benefits policies of tag and label manufacturers. This data provides the opportunity to compare a company's compensation levels to others within the:

- industry as a whole,
- same geographic region as your firm, and
- same sales volume category as your firm.

Insufficient data exists to provide compensation information for Canadian companies. Sales volume groupings are based upon the total gross sales (fiscal year—2018) of all locations for management/sales personnel and of the reporting plant for all hourly and supervisory personnel.

As a company compares its compensation information versus the industry, it should remember that the statistics published in this report should be regarded as "guidelines" rather than "absolute standards." Since companies will differ, depending upon their location, size, and other factors, any two firms may offer their employees a reasonably attractive compensation package and yet be very different. For example, duration of employment and nature of prior experience will obviously influence the compensation offering for a particular individual. Thus, a deviation between any one manufacturer's figures and a number appearing on a table in this report is not necessarily good or bad; it is merely an indication that additional scrutiny may be warranted.

TLMI members should also keep in mind that the data in this report are shown in either one or all of the following, three ways:

- **Average (or Mean)**--the arithmetic average obtained by adding the individual values for all companies answering a particular question and dividing by the total number answering; a measure of central value that can be distorted by extreme high or low values;
- **Median** (typical)--a measure of central value that is not affected by extreme values; calculated by arranging all responses in numerical order and selecting the value that falls exactly in the middle, with half higher and half lower; and
- **Lower and Upper Quartile**--when responses are ordered from lowest to highest, the lower quartile is the response 25% from the bottom and the upper quartile is the response 25% down from the top. In other words, 50% of companies reported values between the upper and lower quartiles. Quartiles are provided to give you an idea of the degree to which the reported data varies.

In cases where sample sizes are too small, insufficient data exists to provide meaningful statistics. Such situations are indicated by "*".

The statistical information contained in this report is believed to be representative of the companies responding to the survey. All reasonable efforts were taken to assure data comparability within the limitations of statistical reporting procedures. However, the statistical validity of any given number varies depending upon sample sizes and the degree of consistency among responses for that particular item. For those individuals having questions, contact: Industry Insights, Inc., 6235 Emerald Parkway, Dublin, Ohio 43016, (614) 389-2100.

Executive Summary

Compensation Dollars--Management/Sales Personnel

Base salary and bonus (or other cash compensation) data was collected for management/sales personnel and shown for all responding companies as well as segregated by sales volume levels and regions in the body of this report.

Compensation levels varied considerably by size of company. As shown in the chart below, companies with higher sales volumes tended to pay higher compensation.

2019 TLMI COMPENSATION & BENEFIT SURVEY

GENERAL INFORMATION

Companies with multiple plants should report separately for each facility by making copies of the survey form. Please note that questions 2 and 5 apply to your entire company. **Deadline to submit is May 31, 2019. Please submit to Industry Insights.**

Please fill out as much information as you can. Try to be as complete as possible even though you may not be able to fill out every line. Dollar amounts should be rounded to the nearest dollar. Omit cents. Also, please ignore the small numbers in the boxes. They are simply to help us process the responses.

1. The information supplied for this survey is for? (Check one)		
1-1 ☐ Entire Organization		
2 ☐ Single Plant (must be a multi-plant company to check this box; include only tag and label plants)		
2. What is the total number of employees in your entire organization?	#	2
3. What is the total number of employees for this reporting plant? (Your response to questions 2 and 3 will be identical if you are a single-plant company)	#	3

COMPENSATION INFORMATION

1. For each job classification that relates to your company, please provide the actual dollar amounts for basic salary, bonus and other cash compensation for the year ended December 31, 2018. While these titles may not match exactly with the titles held at your company, try to match them as best you can. Each executive or manager should be entered in only one classification. If one person has several functions, use the highest level that describes them. Leave non-applicable titles blank. The base salary and bonuses should **exclude** fringe benefits. **Report all data in U.S. dollars. Important note:** Please report all salary and bonus figures based on full year figures. If an employee only worked half the year, please adjust the figures to reflect their annual compensation had they been there for a full year.
